PUBLIC HEALTH STAFF :

MEDICAL OFFICER OF HEALTH,
MEDICAL OFFICER FOR MATERNITY AND CHILD WELFARE CENTRE,
SCHOOL MEDICAL OFFICER,
E. D. ALLEN-PRICE, M.B., CH.B., D.P.H., BIRM.

SURVEYOR AND SANITARY OFFICER,
J. N. SINGLETON, F.S.I., M.R.SAN.I., M.INST.R.A.

HEALTH VISITOR,
MISS M. E. STONE.

State Registered Nurse. Certified Midwife.
Health Visitor's Certificate.
Certificate in Infectious Diseases.

METEOROLOGIST,
MR. W. J. MONK.

MR. CHAIRMAN, MRS. JOHNSTONE AND GENTLEMEN,

I beg to submit the annual report for the year, 1937. It has been prepared as far as information at my disposal will allow in accordance with Circular 1650 from the Ministry of Health.

The birth rate is low, but not unexpected considering the number of residents who live in the town after retirement. The uncorrected death rate is high, as is also to be expected with an ageing population, but after adjustment with the Registrar General's comparability factor the figure of 10.9 is unusually low. It will be seen from the accompanying table that the longevity of the townsfolk is much in evidence.

NATURAL AND SOCIAL CONDITIONS OF THE DISTRICT.

Physical Features. The Urban District lies in the valley of the River Tavy, at approximately Lat. $50^{\circ} 33' N.$, Long. $4^{\circ} 9' W.$ It comprises an area of 2098 acres, and the altitude varies from 228ft. on the Plymouth Road to 564ft. on the Hurdwick Road.

The District is both Urban and Rural in character. The bulk of the former lies along the northern bank of the river, with a branch along a subsidiary valley to the north. The surface is hilly, with general fall towards the river. The nature of the ground varies somewhat, in the higher portions hard rock, shale, or freestone being reached within a few feet of the surface. In the lower-lying portions along the valley, sand, gravel and small boulders, interspersed with beds of loamy earth and weak clay, overlie rock and shale, with the result that subsoil water along the valley is reached at very shallow depths.

Social Conditions. The leisured classes are represented largely by retired army, navy, civil officials, professional men and retired tradespeople occupying detached and semi-detached villa residences. There are a few country seats in the district. The town is well supplied with shops, meeting all the requirements of the district.

Public Recreation Grounds and the Meadows and other open spaces, together with the Drake Statue are features in the district.

The Meadows Pleasure Grounds, are very much appreciated by the public.

The staple industry of the neighbourhood is agriculture, with wool-combing, quarrying, and the usual small engineering, milling, sawing, building, and other works, providing employment for the working classes of the community.

The Charities of the District are :—

Ford Street.—Four Almshouses, each containing four rooms for the accommodation of one person.

Maynard’s Charity.—One house, containing four sets of rooms for the accommodation of old couples.

Browne Memorial.—Eight semi-detached cottages, each with living room, bedroom and offices.

Watts and Ford Street Charities distribute doles of 10s. and upward each year, to a total amount of about £300.

There are also the Marshall Charities in the Whitchurch area which now form part of the district.

SECTION A. GENERAL STATISTICS.

Area (statute acres)—2098 acres.
 Population, 1931 census,—5130.
 Estimated population, mid-1937—5540.
 Number of inhabited houses—1540, an increase of 39 over the previous year.
 Rateable value, £37,193.
 Product of Penny Rate, £146.

VITAL STATISTICS.

						England
				Male	Female	Total and Wales
Live Births	∫	Total	35	28	∫ 63
	∖	Illegitimate		3	2	∫
Birth rate per 1000 of estimated resident population						11.4 14.9
Still Births, legitimate					 1
Still Birth rate					 16 60
DEATHS.—Males 40 Females 45 Total,					 85
Death rate per 1000 resident population					 15.4
Death rate after adjustment					 10.9 12.4
Deaths from puerperal causes					 0.0 3.11
Deaths of infants under one year					 2
Death rate of infants under one year					 32 58

The 85 deaths recorded of townspeople during the past year were made up as follows :—

Measles	0
Whooping Cough			0
Influenza	4
Diarrhoea under 2 years			0
Tuberculosis of Respiratory system				4
Other tuberculosis		1
Cancer	11

SECTION B.

GENERAL PROVISION OF HEALTH SERVICES.

Laboratory facilities are supplied by Devon County Council for testing milk samples and analysing water samples. Also for examining bacteriological specimens of infectious cases.

AMBULANCE FACILITIES.—An ambulance service is offered by a privately controlled ambulance stationed in Tavistock by St. John's Ambulance Brigade.

Infectious cases are carried to hospital by the Plymouth City fever hospital ambulance.

NURSING IN THE HOME.—Arrangements made by local District Nursing Association.

TREATMENT CENTRES AND CLINICS.—A school clinic is held in the town once a week, and is well attended by children with minor ailments or who are in need of regular observation. Cases in need of treatment are referred to the practitioner in charge, and others who are merely delicate are referred to the open-air school at Torrington where they derive great benefit.

HOSPITALS : PUBLIC AND VOLUNTARY.—The town possesses a voluntary Hospital with accommodation for 47 beds. The staff consists of matron, 1 sister tutor, 3 sisters (2 day, 1 night), one assistant nurse, one masseuse, and 7 probationer nurses. During the year 471 cases were admitted, and to these must be added 414 out-patient dressings, and 233 X-ray examinations. One Private Nursing Home.

INSTITUTIONAL TREATMENT FOR MOTHERS AND CHILDREN. The service is available at the Public Assistance Institution.

HEALTH VISITORS.—Health visiting is undertaken by a lady appointed by Devon County Council. She undertakes visiting newly born babies and helping with advice, supervising the home treatment of tuberculous patients, inspection of school-children, etc., and I cannot but stress the importance of this work in maintaining a decent hygiene in the home, the care of mothers and the well being of schoolchildren.

INFANT WELFARE CENTRE.—A very well attended infant welfare is held weekly where babies are weighed and mothers advised by the health visitor or myself. During the year attendances were greatly augmented by the entry of people from outside the town boundary.

Miss Stone, Health Visitor to the Infant Welfare Centre has supplied me with the following figures for attendance of Mothers, Infants and Toddlers at the weekly sessions held on Fridays :—Mothers, 1390 ; Infants, 850 ; Toddlers, 598 ; total, 2838.

A voluntary team of ladies help with the weighing and general comfort of the Babies and Mothers.

ORTHOPAEDIC TREATMENT.—There are no facilities for this in the town, but patients suffering from these defects attend at Plymouth. The Clinic is run on a voluntary basis, but receives help from the Education Committee as regards school children.

SANITARY ADMINISTRATION OF THE DISTRICT.

The Staff consists of the Sanitary Inspector, who also acts as Surveyor, who is an F.S.I. and M.R.San.I.

The County Council in view of the prevalence of Small-pox in other parts have arranged the provision of an Isolation Hospital near Exeter.

Other cases of infectious diseases that require removal are now sent to Plymouth Isolation Hospital.

A Disinfecting Chamber for the district is available. Disinfection is carried out at the Poor Law Institution.

SECTION C.

SANITARY CIRCUMSTANCES OF THE DISTRICT.

Water Supply. The source of the main water supply is intermittent springs and sub-soil water, gathered in the Wallabrook and Sandypark valleys from large drainage areas. The water is collected by means of sub-soil land drains. Distribution is, except in the case of the Whitchurch Down Reservoir, by means of gravitation through mains that vary in size from 10ins. to 3ins. A storage of 368,000 gallons is provided for in three reservoirs, the largest with a capacity of 242,000 gallons, being on the Kilworthy section, and acts as a balancing tank. The Whitchurch Down Reservoir (100,000-gallons) is supplied from the Kilworthy service by means of an electric pump in the Down Road. The pump at the Wharf is kept in reserve for emergency use. The quality is good, and the quantity has been sufficient to maintain a good supply of water even during the dry season of the year.

The Council have engaged a Water Engineer to prepare a scheme for an extension of the water supply to the district.

The Bannawell Street Reservoir is 26,000 gallons capacity.

RAINFALL, 1937.

	Total Depth.	Greatest Fall.	Date.
January	7.72	1.08	17th
February	9.62	1.61	2nd
March	5.42	.79	10th
April	3.16	.51	15th
May	2.86	.62	22nd
June	1.50	.40	8th
July	2.92	1.00	5th
August	1.22	.44	12th
September	4.13	.60	9th
October	3.67	.83	24th
November	3.07	1.23	22nd
December	4.68	.80	4th
	49.97		
	==		

Average amount of rainfall is 47.6 inches.

An additional storage reservoir should be provided for the higher levels.

The Council have under consideration the extension of water mains to the higher levels of the District.

The houses in the district not connected with the town mains number 36, and draw their supply from 14 wells and 9 springs, 19 are above the gravitation supply and the remainder at some distance from the mains.

Drainage and Sewage. The sewage disposal works at Crowndale, are designed on the lines of a combined bacterial and broad irrigation system, and are adequate and satisfactory for the efficient treatment of the town sewage.

Closet Accommodation. The system is, in the main, a water-carriage one, and of the water closets 1786 are provided with flushing apparatus and 16 are hand-flushed. Improvements in closet accommodation are being regularly carried out.

Scavenging. The whole of the work is carried out by direct labour by means of the Council's motor lorry.

The house refuse is collected from the main parts of the town twice a week, the outlying sections having one collection only. The refuse is deposited at a "tip" at Shillamill Quarry.

Sanitary Inspection of the District. The details of this work are furnished in the Sanitary Inspector's Report.

Premises and Occupations. There are no offensive trades carried on in the district.

Schools. The town offers good educational advantages. The Kelly College and Grammar School for boys and girls. There are two private schools. The County Council Junior and Church of England Schools and an Elementary School at Whitchurch supply facilities for elementary education. The new Secondary School is now being used as a mixed school for higher education.

The sanitary apparatus and fittings of the several schools are in good sanitary condition.

The water supply of all the schools in the Urban District is drawn from the town supply. The inspection of the scholars in the elementary schools is carried out by the County Council Medical Officers, who negotiate through local channels for the prevention of the spread of infectious diseases.

SECTION D. HOUSING.

I. Inspection of Dwelling Houses.

- | | | |
|----|----------------------------------------------------------------------------------------------------------------------------------------------------|----|
| 1. | Total number of dwelling-houses inspected for housing defects (under Public Health Housing Acts) | 72 |
| 2. | Number of dwelling-houses which were inspected and recorded under the Housing Regulations | 72 |
| 3. | Number of dwelling-houses found to be in a state so dangerous as injurious to health or unfit for human habitation | 2 |
| 4. | Number of dwelling-houses (exclusive of those referred to under sub-heading 3) found to be not in all respects reasonably fit for human habitation | 20 |

II. Remedy of Defects without service of Formal Notices 25

III. Action under Statutory Powers Demolition Notices served

None.

(a) **Proceedings under Public Health Acts.**

- | | | |
|----|----------------------------------------------------------------------------------------------------|----|
| 1. | Number of dwelling-houses in respect of which notices were served requiring defects to be remedied | 23 |
| 2. | Number of dwelling-houses in which defects were remedied :— | |

- | | | | | | | |
|-----|-----------|------|------|------|------|----|
| (a) | By Owners | | | | | 23 |
|-----|-----------|------|------|------|------|----|

- (b) By Local Authorities in default of Owners Nil

|-----|--------------------------------------|------|------|---|
| (b) | Proceedings under Housing Acts, 1925 | | | 2 |
|-----|--------------------------------------|------|------|---|

- | | | | | | | |
|-----|---------------------|------|------|------|------|---|
| (c) | Closing Orders Made | | | | | 2 |
|-----|---------------------|------|------|------|------|---|

IV. **Housing Act, 1935.—Overcrowding :—**

(a)— (i) Number of dwellings overcrowded at the end of the year	8
(ii) Number of families dwelling therein	8
(iii) Number of persons dwelling therein	57
(b)—Number of new cases of overcrowding reported during the year	Nil
(c)— (i) Number of cases of overcrowding relieved during the year	1
(ii) Number of persons concerned in such cases	3½
(d)—Particulars of any cases in which dwelling-houses have again become overcrowded after the Local Authority have taken steps for the abatement of overcrowding	Nil
(c)—Any other particulars with respect to overcrowding conditions upon which the Medical Officer of Health may consider it desirable to report.						

Housing Statistics (a) The total number of houses in the District is 1548, and of these 950 are occupied by working class families.

Housing (a) Statistics.

Number of new houses erected during the year :—

(a) Total (including number given separately under “b”)	39
(b) With State assistance (under Housing Acts) :—	
I. By Local Authority None
II. By other persons or bodies None
(c) Without assistance :—	
I. By other persons or bodies 39
	—
	39

General Observations as to Housing Conditions. The Council have under their powers under the Housing Act, 1930, dealt with 4 slum clearance areas, comprising 37 houses, and have built 36 new houses to accommodate the people displaced. One house has been closed. The Council have now under consideration the provision of further houses to relieve overcrowding.

Sufficiency of Supply of Houses.

- (a) There is still need for new houses at reasonable rents, some 20 being required.
- (b) The population shows an increase owing to extension of area.
- (c) There are no special difficulties in the way of providing such houses.

Except in a few cases the whole of the houses are supplied with water from the public supply. Closets are generally fitted with flushing apparatus.

- (a) No evidence is to hand that the Bye-laws in any way interfered with the erection of houses.
- (b) The number of houses inspected are shown in the Inspector's Report.

The Housing (Inspection of District) regulation, 1910 ; this work is carried out by the Sanitary Inspector, who also acts as Surveyor and in other capacities together with myself.

The Markets, Slaughter Houses, etc., are inspected and foods diseased or unwholesome are dealt with under the Public Health Acts. The seizures during the period under review numbered 36, including 5 animals and 31 parts of same.

SECTION E.

INSPECTION AND SUPERVISION OF FOOD.

Food. (a). No cases of infectious disease have been attributable to milk contamination.

School Milk. Samples of these are taken from time to time and the results of the analysis have been found good.

Milk. A sample is now taken weekly and sent to the County Council for analysis. Reports received shew of the samples sent, 27 passed, 31 failed.

(b) The slaughter houses are substantially constructed, paved, drained, and for business purposes conveniently situated and easily accessible for the purpose of inspection, and are being kept in good condition and well cleaned regularly.

The slaughter houses are owned and under the direct control of the Council.

The private butchers' shops having fitted glass fronts or glazed shutters, the P.H. Meat Regulations, 1924, are being carried out.

SECTION F.

PREVALENCE OF, AND CONTROL OVER, INFECTIOUS AND OTHER DISEASE.

In the early part of the year an influenza epidemic was responsible for four deaths, and the following infectious diseases were notified.—

	Pneumonia	7 cases.
	Typhoid Fever	3 cases.
	Scarlet Fever	1 case.
	Diphtheria	1 case.
Poliomyelitis	Pononyentis	1 case.

TUBERCULOSIS.

Thirteen new cases were notified. The incidence, as usual, falling on the young people of both sexes. The subjoined table gives the distribution of the notifications and five recorded deaths.

PREVALENCE OF, AND CONTROL OVER, TUBERCULOSIS.

I am, Mrs. Johnstone and Gentlemen,

Your obedient servant,

E. D. ALLEN-PRICE,

Medical Officer of Health.

April, 1938.

COUNCIL OFFICES,
TAVISTOCK.

To Dr. ALLEN-PRICE, Medical Officer of Health.

Sir,

I beg to submit the Inspector's Report for year ended the 31st day of December, 1937.

Inspections. Inspections during the period include :—
380 visits to houses.
54 „ „ 36 dairies and cowsheds.
39 „ „ 39 factories and workshops.
485 „ „ schools, stations, slaughterhouses,
markets, and other premises and
works not otherwise included.

Notices. Twenty-three preliminary notices have been served and the requirements have been carried out in each case.

Sanitary Work. The Sanitary work carried out as a result of the inspections made include :—

- 8 Drainage systems repaired and relaid in part.
- 3 New water closets constructed.
- 1 Bath fixed.

Housing. Thirty-nine houses have been completed by private enterprise and are occupied.

The sanitary work in connection with these houses has been :—

- 22 New Drainage systems laid and connected to sewers.
- 48 Water Closets constructed.
- 39 Baths have been fitted to new houses.
- 45 Lavatory Basins.

Disinfection. Disinfection of the rooms, bedding and clothing, etc., has been carried out in 39 cases. Arrangements have been made for the use of the steam apparatus in use at the Poor Law Institution and this method is adopted as required from time to time.

Dairies and Cowsheds. The retailers of milk registered number fourteen, four distribute direct from carts, two retail a small quantity from premises also used as restaurants. The conditions are generally satisfactory. Six only of the registered retailers are engaged in the production of milk.

Five wholesale dealers in milk are registered and in every case small separate milk stores are provided for the storage of milk and dairy produce on the premises. the cowsheds are of substantial construction and, on inspection, have been found in a cleanly condition.

There are also registered thirteen owners of cows that are kept for the domestic supply of milk and dairy produce.

Factories and Workshops. 39 visits have been made to factories and workshops, and these were found generally clean.

Food Inspection. One Bullock, one Sheep, three Pigs, and 31 Pigs' heads have been seized and destroyed.

House Refuse Removal. The removal of the refuse from the town by motor lorry is working satisfactorily and is deposited in a disused quarry.

Sewerage and Sewage Disposal. The sewerage system of the district has continued satisfactory throughout the year. An extension of the Sludge Beds has been made during the year.

The Disposal Works at Crowndale continue to deal with the sewage without complaint. The works are being kept in order and the duties of the attendant are carried out regularly and well.

Water Supply. The Supply during the year has been ample and well maintained.

39 additional houses have been connected up during the year, and additional supply to 48 new w.c.'s, 39 baths, and 45 lavatory basins made.

J. N. SINGLETON.

Sanitary Officer.
